

Certificate regarding nanoparticles in fixed construction products

The certificate covers construction products such as floor sealings, kitchen and bathroom interiors, appliances, windows and ventilation systems.

Product name:	All air diffusers, see product range www.swegon.com
Manufacturer/supplier:	Swegon AB, Tomelilla

Table 1 Product type

Floor sealing	<input type="checkbox"/>	Ventilation system	<input checked="" type="checkbox"/>
Kitchen interior	<input type="checkbox"/>	Appliances	<input type="checkbox"/>
Bathroom interior	<input type="checkbox"/>	Type of appliances:	
Window	<input type="checkbox"/>		

	Yes	No
Are there nanoparticles in the product*?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Does the product contain:	Yes	No
A. Nanometal?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
B. Nanocarbon compound?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
C. Nanofluorine compound?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
D. Other nano compound?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

If D equals yes, what nano compound(s) and what function does it have? Fill in table 2.

Table 2, list of other nanoparticles

Nanoparticles	Function

* Nanoparticles are defined as microscopic particles with dimensions less than 100 nm. Nanometals are, for example, nanosilver, nanogold and nanocopper. Traces of nano-sized particles, which have not been added to achieve a specific function in the product, are not covered by the requirement.

We certify that the above products do not have added nanometals, nanocarbon compounds and/or nanofluorine compounds and that the use of other nanoparticles will not cause environmental or health problems.
